Stylistically confident and versatile: accessory highlights from Naber

The kitchen faucet series Namor[®] combines great design with outstanding material quality. The durable faucets from the ARMATE[®] SERVIZIO range from Naber are made entirely of stainless steel and equipped with a high-quality ceramic cartridge including scald protection. There is a choice of two surface finishes: black matt and brushed stainless steel.

The name Namor[®] stands for product design with a comprehensive concept: ease of use inspires the consumers, ease of installation inspires the fitters, and the sustainability attributes are geared towards economical use of resources. With their large swivelling range, the Namor[®] single-lever mixers provide plenty of scope for action at the sink. The three different design concepts each include a model with a pull-out hose with shower head and two types of water jet.

The long connection hoses and special mounting equipment are particularly convenient for quick and easy installation. All Namor[®] faucets include a laminar aerator for a natural stream of water and low water consumption. The L-shaped and C-shaped models feature the side-mounted operating lever with energy-saving cold start function. Naber provides customer service in Germany, Austria and the Netherlands and gives a five-year guarantee on its faucets.

Attractive rail and shelf system with lighting

When it comes to kitchen accessories, storage is an ever-present issue. The extremely flexible rail and shelf system transFORM in the ACCOMODA[®] niche equipment range from Naber provides stylish options. Visually, it impresses with its cutting-edge matt black powder coating and subtle lighting. Inserted into the base profiles, LED Stripes provide the backlighting that captivatingly sets the scene for elegant and everyday objects. The lighting of the profiles is dimmable and can be integrated into individual lighting concepts.

The basis of the transFORM system comprises high-quality aluminium base profiles plus trapezoidal cover profiles. Together with the other system elements, they enable the effortless and creative design of elegant slatted walls, shelves and wall units. The rail system includes shelves, hook strips, spice racks, tubular pots, roll, glass and bottle holders, a power box with sockets and much more. At the "Plus X Award", transFORM was presented with the seals of approval for high quality, design, ease of use and functionality. The jury of the innovation competition rated the system as the "best product of 2024" within its product category.
